Aesthetic and Magnificent: Glasses

If there is something as important as what you drink, it is what you drink it with. When it comes to the greatest thing that completes a drink and adds aesthetics and taste to it, the glasses it is drunk from naturally come to mind. Glasses are an inseparable part of the drinking culture. This tradition has been perfected over the centuries so that you can get the right taste from your drink.

Glasses designed with developing glass processing techniques have also taken their final form. In the designs of all these glasses, very fine details have been given importance so that the drink is preserved in the most appropriate way and its taste remains on the palate in the best way.

One of the basic issues that determines the shape of the glass of the drink you want to serve is its relationship with heat. Many glasses have a long stem so that you do not heat your drink while holding it in your hand. We can say that water and wine glasses come first. In this way, your drink does not come into direct contact with your body heat and maintains its coldness. When it comes to glasses, this shape is actually acceptable for wine glasses. Of course, it should not be forgotten that wine also has different glasses for red and white. Due to the small difference between them, you can sometimes see them mixed even in restaurants. Red wine glasses have a rounder and wider structure. Thus, the taste is more efficient from its thick state. However, white wine glasses are longer than red because they have less density. How much of the glass is filled is also very important for service and drinking. Red wine glasses are filled one-third, while white wine glasses are served two-thirds full.
